

## Tot Tot Hosta

---

### Tot Tot Hosta *Hosta 'Tot Tot'*

Plant Height: 7 inches

Flower Height: 14 inches

Spread: 21 inches

Spacing: 16 inches

Sunlight: ● ●

Hardiness Zone: 3a

Other Names: Plantain Lily, Funkia

#### Description:

A compact, spreading clump of blue-green arrowhead foliage that are wavy, and of good substance; pale lavender flowers in early summer on short stems; perfect for shade and woodland gardens

#### Ornamental Features

Tot Tot Hosta features dainty spikes of white tubular flowers rising above the foliage in mid summer. Its attractive textured pointy leaves remain bluish-green in color throughout the season.

#### Landscape Attributes

Tot Tot Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Tot Tot Hosta is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

### Planting & Growing

Tot Tot Hosta will grow to be about 7 inches tall at maturity extending to 14 inches tall with the flowers, with a spread of 21 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 16 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
