

Fragrant Frosty Scented Geranium

Fragrant Frosty Scented Geranium *Pelargonium 'Fragrant Frosty'*

Height: 24 inches

Spread: 4 feet

Spacing: 4 feet

Sunlight:

Hardiness Zone: (annual)

Other Names: Scented Pelargonium

Description:

Lime green, deeply lobed leaves with cream tips and a lemon citrus scent; dainty clusters of single white flowers dot the plant all season; perfect for patio containers, where the scent can be appreciated

Ornamental Features

Fragrant Frosty Scented Geranium features dainty clusters of lightly-scented white flowers with dark red stripes at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its fragrant lobed leaves remain lime green in color with prominent creamy white tips throughout the year.

Landscape Attributes

Fragrant Frosty Scented Geranium is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It has no significant negative characteristics.

Fragrant Frosty Scented Geranium is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Fragrant Frosty Scented Geranium

Planting & Growing

Fragrant Frosty Scented Geranium will grow to be about 24 inches tall at maturity, with a spread of 4 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 4 feet apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Fragrant Frosty Scented Geranium is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
